

Referral Reward Program

By Vicki Hauser MSC

Do you have a friend or loved one who seems to be having a hard time hearing? If you have noticed it, they almost certainly know the problem exists. However, many people “put off” getting help. Studies have shown beyond any doubt that having your hearing corrected early allows you to get *much* more benefit from your hearing instruments.

You can help that friend or loved one out today and at the same time, earn a reward for yourself.

At *The Hearing Place*, we are enacting a new referral program. Effective immediately, if you send someone to us for a hearing test, you will receive a **FREE box of sixty batteries**. If their hearing loss is confirmed and they purchase the hearing instrument we recommend, you will also receive a **\$25.00 Visa or MasterCard gift card**.

Introduce a friend or loved one to “*The Latest Technology and Old Fashioned Care*” at **The Hearing Place**. You will be doing them a big favor!

THE HEARING PLACE
 LATEST TECHNOLOGY - OLD FASHIONED CARE

See What's New! No more batteries? New mini size!

By Lisa Leanna

Phonak - Today, lithium-ion is the fastest growing and most promising battery technology that offers 40% more power than conventional rechargeable batteries. The Phonak rechargeable hearing aid is the first ever to feature a built-in lithium-ion rechargeable battery, providing 24 hours of hearing with a simple charge of just 3 hours. The 30 minute fast-charging option gives 6 hours of immediate use.

Car Charger

It is the quickest charging, longest lasting rechargeable hearing aid ever produced. Additionally, lithium-ion batteries last through the lifetime of a hearing aid, even after years of repeated charging. This frees you from the cumbersome task of regularly changing their batteries.

This new aid is enhanced with features such as adaptive SoundRecover2 to offer even better hearing performance in everyday listening situations. Its fully automatic operation gives you an effortless hearing experience without having to press buttons

or switch between listening programs, proven to deliver 20% better speech understanding in general and 60% improvement in speech understanding when in a noisy environment thanks to the highly-sophisticated automatic selection. The new Phonak Belong product platform, features a host of innovative technologies that have been created specifically to simplify the life of people with hearing loss.

Sivantos/Siemens - Due to the integrated lithium-ion power cell, there is no more need for users to even think about batteries. This not only reduces handling efforts but also saves money and is eco-friendly. The unique inductive charging makes it the easiest possible charging process ever. Cellion primax is the only inductive, wireless and contact-free chargeable hearing aid in the world. Yet it is still one of the smallest hearing aids in general.

For travelers, the charger unit is equipped with a standard micro USB interface, enabling a charging of the hearing aids with nearly any USB compatible power source (e.g. laptops, car adaptors, power packs etc.).

Cellion primax is nearly sealed, making it very robust and resistant against dust and humidity. Cellion primax power management is breathtaking, unrivaled by any other hearing aid. Regardless of the hearing loss, it can run for at least 24 hours with unlimited streaming. The power cells have a life-span of several years, easily lasting the entire life span of the hearing aid. Even if the exchange of the power cell should become necessary, it can be done by any hearing care professional.

Unitron - This newest addition to the most design-focused lineup of RICs delivers amazing comfort, beautiful aesthetics and intuitive functionality, all powered by the North platform.

Even though Moxi Now is the world's smallest hearing instrument in its class, we still managed to pack in all the features and functionality you need to give you the best hearing experience possible.

Available in an array of colors, Moxi Now offers the perfect choice to suit your style.
